PROFESSIONAL SUMMARY

Full Stack Developer and Microbiology graduate building at the intersection of software, education technology, and cybersecurity. Developing EduTrak, a multi-tenant school management system for Kenya's CBC curriculum.

TECHNICAL SKILLS

Languages/Tools: JavaScript, Python, Bash, SQL, Linux CLI, Git/GitHub

Frameworks: React, Node.js, Express.js, Prisma ORM, REST APIs, JWT

Databases: PostgreSQL, MongoDB

Security: Kali Linux, Nmap, Gobuster, SQLMap, HackTheBox, Proxychains

PROJECTS

EduTrak (In Development) - React, Express, PostgreSQL, Prisma, JWT

Multi-tenant school management system supporting CBC and 8-4-4 curricula.

School Management System (Production) - MongoDB, Express, React, Node.js

Deployed platform for student records, grading, and report generation; estimated 70% reduction in admin workload for end users.

AI Prompt Builder (In Development) - MERN, AI APIs, OAuth, REST

Social platform for creating, testing, versioning, and sharing AI prompts.

Proxy-Xtractor (Stable) - Bash, Python, Web Scraping

Scrapes and validates SOCKS5 proxies and configures proxychains4 workflows.

IP2Binary (Stable) - Bash, Python, Networking

CLI tool to convert IPv4 addresses to binary and back for subnetting practice.

EDUCATION

BSc. Microbiology, Karatina University

CERTIFICATIONS

HackTheBox - Active Member (2024-Present)

freeCodeCamp - Responsive Web Design (2023)

freeCodeCamp - JavaScript Algorithms & Data Structures (2023)

TARGET ROLES

Internship / Junior Full Stack Developer roles (EdTech, Security, Dev Tools)
